## [This is why you don't like fingers scraping the chalkboard](#)

**December 24th, 2011**

Ever wondered why the sound of fingers spread the chalkboard drives you to distraction? Well, this intriguing new research that has isolated the reason from a scientific perspective. The frequency of the sound ranges between 2000 and 4000 Hz. To the ear canal, this is called “the zone of terror”, where the human ear is the most sensitive. According to musicologist Christoph Reuteur, “some frequencies are amplified due to the anatomy of the ear canal.” Powered by [The Online Casino](#)
